**Data Flow Diagrams:**

**Simplified Diagram:**

1. User can create account for analysis.
2. User can access application by any browser.
3. Selected data can be extracted.
4. Once user had registered I can login to it by the credentials.
5. User can access the dashboard. There user can view and upload the data
6. The notification for the user by browser on login on application.
7. Extracted data is passed to data analytics for enrichment
8. Enriched data is visualized using the cognos and ML.
